

I am a Xm Radio subscriber and enjoy the services. I expect the right to be able to hear weather reports and trafic reports whenever I want as this is one of the services I pay for. XM radio is a product that the individual pays for because they are tired of the regular commercial radio with all the talk hype and selling technics. The public has the choice to pay extra not to have to listen to advertising for 30 minutes an hour. So taking constant weather and trafic reporting away from XM would be a terrible public injustice.Thank You
